

# Training

Our training is delivered by highly qualified and experienced staff and can be tailored to your specific needs.

## Dairy / Vet Training

2 day CPD course:

- Learn how the milking inflation interacts with the animal and how good design can lead to improved animal health and milk quality
- Classroom and parlour based sessions included

## Statistics in Industry and Successful Experimental Design

2 day course and lectures with workshops covering:

- Basic statistics and statistics for process control + quality systems
- Data analysis, regression and multivariate analysis
- Basic experimental design

## Other Industrial Based Courses include:

- Disciplined problem solving
- Lean improvements / Kaizen (six sigma orange belt).
- Six sigma Green belt, Black belt
- New product introduction and QMS, FMEA

## Rubber Compound Design

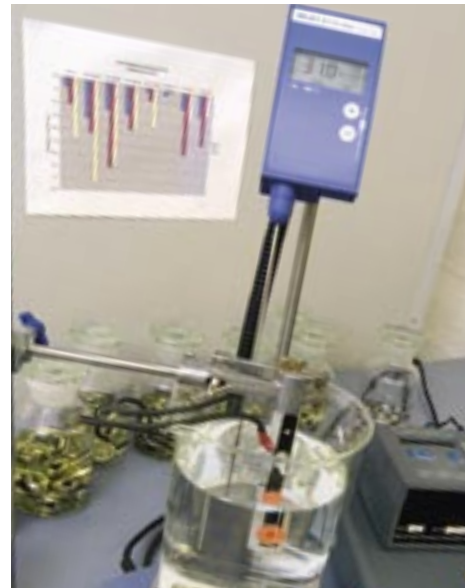

Basic rubber technology for:

- Dynamic applications
- Chemical resistance
- Improvements in processing and product durability

## Rubber in Dynamic Applications

Understanding the issues of:

- Hysteresis
- Strain amplitude effects
- Frequency effects
- Temperature effects
- Dynamic testing

## Customised Training

Discuss your requirements with us, we can arrange courses to suit your needs either from our own internal staff or from external trainers.
